

Goal: The project involved finding a data job close to home, kids and spouse. Currently too many job sites, too many duplicate listing, phishing listings. Commute times can vary widely depending in direction and time of day. Miles is a poor indicator of commute time.

Problems:

- 1) Too many job sites, too many duplicate listing, phishing listings
 - 2) Commute times can vary widely depending in direction and time of day
- Miles is a poor indicator of commute time. We can do better!!!

Architecture:

Career Search

The latest jobs. Results you can trust.

- ✓ Search for positions according to job title and key word.
- ✓ Eliminate duplicate listings and phishing by recruiters.
- ✓ Find jobs according to commute time and not distance.

Find the right one.

Your career search simplified.

Job listing sites are great tools for matching employees with jobs posted by employers. These sites are wildly successful. Unfortunately, many job-seekers become overwhelmed by the sheer number of listings that are duplicated across sites or fail to match their qualifications.

This application simplifies the job hunt by gathering postings from various job sites. In addition to searching for the desired job title, key terms and travel time from home are evaluated for best match. The top ten results are displayed, streamlining the applicant's search.
